Description

Mercury M8 Drive FEATURES
• Combines best features of the dry-sump NXT¹ & Six drives. Dry-sumped for maximum power-output. Delivers 35% more power capacity than the legendary Six drive.
• All-new surface piercing gearcase, packed with heavy-duty components, is designed specifically to handle the 1350's higher torque.
• New 5 & 6-blade CNC sterndrive propellers are designed with stamina to allow the engine to endure in both treacherous and ideal offshore conditions.
• Two inches shorter resulting in an overall lower center of gravity for improved handling and overall boat performance.
• All new dry sump hydraulic transmission to handle the 1350's massive torque.
• While the lower drive cavity is bathed in oil, a unique propshaft driven oil pump sprays the upper drive gears. This reduces internal friction, increasing performance.

SPECIFICATIONS
Max. Power Cap. □□□1350 hp Input torque rating of 1300 ft. lbs.
Lower Unit Design □□□Dry Sump Drive & Transmission
Max. Prop Diameter □□□18 inches
Available Gear Ratios □□□1.69:1, 1.53:1, 1.40:1, 1.30:1
Proshaft Rotation □□□Left Hand & Right Hand Rotation
Drive Weight (lbs./kg.) □□□280/127

Features

Horse Power (hp)	1350

Engine Details

Horse Power	1350
